NEW QUESTION: 1Your company has a main office and a branch office. Each office contains several servers that run Windows Server 2012.You need to configure BranchCache for the client computers in the branch office. The solution must ensure that all of the cached content is in a central location.What should you run on each client computer?**A.** the winrm command**B.** the Enable-BCDistributed cmdlet**C.** the netdom command**D.** the Enable-BCHostedClient cmdlet

Answer: DExplanation:Enable-BCHostedClientConfigures BranchCache to operate in hosted cache client mode.Note:*BranchCache is designed to reduce WAN link utilization and improve applicationresponsiveness for branch office workers who access content from servers in remotelocations. Branch office client computers use a locally maintained cache of data to reducetraffic over a WAN link. The cache can be distributed across client computers (DistributedCache mode) or can be housed on a server in the branch (Hosted Cache mode). *BranchCache is disabled by default on client computers. Take the following steps toenable BranchCache on client computers:Turn on BranchCache.Enable either Distributed Cache mode or Hosted Cache mode.Configure the client firewall to enable BranchCache protocols.

NEW QUESTION: 2Your customer wants to prevent their department managers from viewing the results of other departments where they have no management authority.What should be implemented for this type of security?**A.** Segment Value Security**B.** Role-Based Access**C.** Cross-Validation Rules**D.** Data Access Sets**Answer: A**

NEW QUESTION: 3The research and development (R&D) team has been working on developing a new software product for nine months and feel the product is now ready for release to the market and for final handover to the operations team. The operations manager asks the operations team to do a quick test and report the findings. The report highlights that there are many changes to this new product's interface of which the operations team was not aware. This will require new training.What should the project manager have done''**A.** Held two days of training to detail the changes and make the operations team comfortable with the changes**B.** Met with the operations manager and given the entire operations team a walk-through of the product beforehand**C.** Included operations resources in the project to ensure knowledge transfer between the project and operations for implementation**D.** Understood that the R&D and operations teams are two different entities and established a separate transfer project
Answer: C
