**NEW QUESTION: 1**You need to use Reporting Services Configuration Manager to configure SSRS to complete the installation on SSRS02.What should you do? (Each correct answer presents a partial solution. Choose all that apply.)**A.** Change the encryption key.**B.** Delete the encryption key.**C.** Set the Report Server Web Service URL.**D.** Join the scale-out deployment.**E.** Specify the execution account.**F.** Set the Report Manager URL.**Answer: A,E,F****Explanation:**A: We need to restore a copy of the encryption key from SSRS01. This step is necessary for enabling reversible encryption on pre-existing connection strings and credentials that are already in the report server database.B: Reporting Services provides a special account that is used for unattended reportprocessing and for sending connection requests across the network. The account is usedin the following ways:/ Send connection requests over the network for reports that use database authentication,or connect to external report data sources that do not require or use authentication./ Retrieve external image files that are used in report. If you want to use an image file andthe file cannot be accessed through Anonymous access, you can configure the unattendedreport processing account and grant the account permission to access the file.E: Example:1.First of all open Internet Explorer and go to Report Manager URL which is something likebelow:http://string-pc/Reports20122.Click on your SSRS project. So now it will show you the list of reports which aredeployed on your report server.3.Now click on down arrow on the report which you want to subscribe and selectManage. Etc.\* From Scenario:/ A new server named SSRS02 has been joined to the domain, SSRS02 will host a single-server deployment of SSRS so that snapshots of critical reports are accessible during theupgrade./ You have the following requirements for SSRS02:Replicate the SSRS01 configuration.Ensure that all current reports are available on SSRS02.Minimize the performance impact on SSRS01./ In preparation for the upgrade, the SSRS-related components have been installed on the new SSRS02 server by using the Reporting Services file-only installation mode. The Reporting Services databases have been restored from SSRS01 and configured appropriately./ SSRS02 is the recovery server and is running the same version of SSRS as SSRS01. The report server configuration files, custom assemblies, and extensions on SSRS02 are manually synchronized with SSRS01.---
