**NEW QUESTION: 1**Ihr Netzwerk enthält eine Active Directory-Domäne mit dem Namen adatum.com. Die Domäne enthält die in der folgenden Tabelle aufgeführten Benutzer. Die Domäne enthält einen Computer namens Computer1, auf dem Windows10 ausgeführt wird. Computer1 verfügt über eine Datei mit dem Namen File1.txt, die über die in der Ausstellung angezeigten Berechtigungen verfügt. (Klicken Sie auf die Registerkarte Ausstellung.) Wählen Sie für jede der folgenden Aussagen Ja aus, wenn die Aussage wahr ist. Andernfalls wählen Sie Nein. HINWEIS: Jede richtige Auswahl ist einen Punkt wert. **Answer:** Explanation: Explanation: Box 1: No User1 only has Read access to the file. Box 2: Yes User2 is in Group2 which has full control. The condition states that if the user is also a member of Group3, the permission would not apply. However, User2 is not in Group3 so the full control permission does apply. Box 3: No User3 is in Group3 which does have Read access. However, the condition states that if the user is also in Group1 or Group2 then the permission does not apply. User3 is in Group2 so the Read permission granted to Group3 does not apply to User3.

**NEW QUESTION: 2**You have a Microsoft 365 subscription. Your company purchases a new financial application named App1. From Cloud Discovery in Microsoft Cloud App Security, you view the Discovered apps page and discover that many applications have a low score because they are missing information about domain registration and consumer popularity. You need to prevent the missing information from affecting the score. What should you configure from the Cloud Discover settings? **A.** Default behavior **B.** App tags **C.** Organization details **D.** Score metrics **Answer: D** Explanation: An app's score in Cloud Discovery is based on categories such as General, Security, Compliance and Legal. Each category has several parameters. For example, the domain registration and consumer popularity parameters are part of the General category. These parameters are known as Score Metrics. You can modify the default weights given to the Cloud Discovery score configuration. By default, all the various parameters evaluated are given an equal weight. If there are certain parameters that are more or less important to your organization, you can adjust the weight of each score metric.
