NEW QUESTION: 4 To specify the node name for the NAS file server when processing NAS file systems, use the NASNODENAME option on the command line, or place in which file?
A. Backup copy group
B. Include/exclude list
C. Client options file
D. Server options file
Answer: C
Explanation: Explanation Use the nasnodename option to identify the NAS file server. Place the nasnodename option in your client system-options file (dsm.sys). The value in the client system-options file is the default, but this value can be overridden on the command line. If the nasnodename option is not specified in the client system-options file, you must specify this option on the command line when processing NAS file systems.
