NEW QUESTION: 1 Robert has configured a Common Internet File System (CIFS) resource to allow access to the public partition of his company's file server, on \\eriscogoldenapplefilespublic. Robert receives reports that users are unable to access the shared partition, unless they use the file server's IP address. Which of the following is a possible cause? **A.** Mapped shares do not allow administrative locks. **B.** The CIFS resource is not configured to use Windows name resolution **C.** Access violations are not logged. **D.** Remote registry access is blocked. **E.** Null CIFS sessions are blocked. **Answer: B**

NEW QUESTION: 2 In video products network diagram, which layer is SwitchCentre located in ? () **A.** User Access Layer **B.** media exchange layer **C.** Network control layer **D.** operational support layer **Answer: C**

NEW QUESTION: 3 Refer to Scenario. The Chief Technical Officer (CTO) of a large company has directed their IT management staff to examine corporate wide operations and find ways to limit the cost of operations. The corporate directives have prompted adoption of company policies that include the use of virtualization for all new servers and as many services as possible. The company is subject to government regulations concerning data retention policies for confidential data. Data has to be retained for seven years. An audit of the backup and recovery environment is performed. The exhibit shows a typical site and how it is connected to the disaster recovery environment. Data in the primary site is configured on VMAX storage using FAST-VP to support multiple work load types on a single storage array. Data is protected by SRDF/A to a remote VMAX which acts as a target for multiple sites. The remote copy of the data is snapped and copied to tape. Retention is accomplished to governmental standards by offsite storage of tape in a remote protected facility. The company has noted that it has the following requirements in any proposed architecture for the backup and recovery environment: Reduced power consumption Reduced floor space consumption Reduced storage capacity consumption Lower WAN bandwidth utilization Shorten RPO Decrease RTO Increase security Lower Total Cost of Ownership (TCO) The company has been unable to achieve the RTO required by their Service Level Agreement to their major clients. If they want to limit TCO, which EMC solution should be proposed? **A.** NetWorker and Data Domain **B.** NetWorker and Avamar **C.** Data Domain **D.** Avamar **Answer: C**
