NEW QUESTION: 1 Out of several risk responses, which of the following risk responses is used for negative risk events?
A. Enhance **B.** Exploit **C.** Explanation: Among the given choices only Acceptance response is used for negative risk events. Risk acceptance means that no action is taken relative to a particular risk; loss is accepted if it occurs. If an enterprise adopts a risk acceptance, it should carefully consider who can accept the risk. Risk should be accepted only by senior management in relationship with senior management and the board. There are two alternatives to the acceptance strategy, passive and active. Passive acceptance means that enterprise has made no plan to avoid or mitigate the risk but willing to accept the consequences of the risk. Active acceptance is the second strategy and might include developing contingency plans and reserves to deal with risks. **D.** Share **E.** Accept **Answer: C, E**
Explanation: A, and B are incorrect. These all are used to deal with opportunities or positive risks, and not with negative risks.

NEW QUESTION: 2 An organization will be extending its existing on-premises infrastructure into the cloud. The design consists of a transit VPC that contains stateful firewalls that will be deployed in a highly available configuration across two Availability Zones for automatic failover. What MUST be configured for this design to work? (Select two.)
A. Static routing **B.** A different Autonomous System Number (ASN) for each firewall. **C.** Equal-cost multi-path routing (ECMP) **D.** Autonomous system (AS) path prepending **E.** Border Gateway Protocol (BGP) routing
Answer: D, E
Explanation: Explanation
<https://docs.aws.amazon.com/solutions/latest/cisco-based-transit-vpc/appendix-a.html>
