NEW QUESTION: 1You can replicate the following classification data from SAP CRM to the SAP NetWeaver MDM Product Catalog to enable the system to show characteristics in the Web shop: Note: There are 3 correct answers to this question.**A.** Classification data of variant-creating characteristics (relevant only for generic articles and variants)**B.** Used variant-creating characteristics and characteristic values for each generic article**C.** Used variant-creating characteristics and characteristic values for each variant**D.** Characteristic master data**Answer: B,C,D**

NEW QUESTION: 2You are planning a project and want to account for how the project will be managed in the future. While building your cost performance data, you want to provide guidance for when the project is later executed, because you know that different responses are required depending upon the degree of variance from the baseline. For example, a variance of 10 percent might not require immediate action, whereas a variance of 20 percent will require more immediate action and investigation. You decide to include the details of how to manage the cost variances as part of which following plan?**A.** Performance measurement plan**B.** Change management plan**C.** Cost management plan**D.** Variance management plan**Answer: C**
Explanation: Explanation/Reference: Explanation: The management and control of costs focuses on variances. Certain variances are acceptable, and others, usually those falling outside a particular range, are unacceptable. The actions taken by the project manager for all variances are described in the cost management plan.

NEW QUESTION: 3By default, if an alarm exists on a given model as a result of an event, CA Spectrum does not generate another alarm if the same event occurs again on the model. If you need to change this behavior, you can use:**A.** custom alarm events**B.** alarm counter rules**C.** alarm discriminators**D.** alarm attribute descriptors**Answer: C**
