NEW QUESTION: 1A user is experiencing difficulty activating a second device using BlackBerry@ Web Desktop Manager. What should be checked in BlackBerry Administration Console to ensure a second device can be activated?**A.** Email profile**B.** Enterprise Proxy**C.** BlackBerry Controller**D.** License limit**Answer: D**

NEW QUESTION: 2Each work process...There are 3 correct answers to this question.**Response:****A.** Can make database changes spanning multiple database LUWs.**B.** Uses a pool of database connections established when the SAP NetWeaver Application Server ABAP started.**C.** Uses a database connection to a work process established when the SAP NetWeaver Application Server ABAP started.**D.** Can only make database changes within a single database LUW.**E.** Is independent of other work processes.**Answer: C,D,E**

NEW QUESTION: 3You decided to use Cloud Datastore to ingest vehicle telemetry data in real time. You want to build a storage system that will account for the long-term data growth, while keeping the costs low. You also want to create snapshots of the data periodically, so that you can make a point-in-time (PIT) recovery, or clone a copy of the data for Cloud Datastore in a different environment. You want to archive these snapshots for a long time. Which two methods can accomplish this? Choose 2 answers.**A.** Use managed export, and then import to Cloud Datastore in a separate project under a unique namespace reserved for that export.**B.** Write an application that uses Cloud Datastore client libraries to read all the entities. Format the exported data into a JSON file. Apply compression before storing the data in Cloud Source Repositories.**C.** Use managed export, and store the data in a Cloud Storage bucket using Nearline or Coldline class.**D.** Use managed export, and then import the data into a BigQuery table created just for that export, and delete temporary export files.**E.** Write an application that uses Cloud Datastore client libraries to read all the entities. Treat each entity as a BigQuery table row via BigQuery streaming insert. Assign an export timestamp for each export, and attach it as an extra column for each row. Make sure that the BigQuery table is partitioned using the export timestamp column.**Answer: B,D**
