NEW QUESTION: 4You are an administrator for a company. You are planning an Office 365 pilot. The current environment has servers that run Windows Server 2012. There is no budget to upgrade the servers. You add an external DNS record for Active Directory Federation Services (AD FS). You must implement a single sign-on (SSO) solution for users to access the Office 365 resources. You must deploy the AD FS components with the following requirements: * Loss of a single server must not prevent any authentication request or management function. * Users must be able to access the Office 365 environment from their home computers by using their corporate credentials. * Any modifications to service configurations must be made after servers are deployed. You need to deploy AD FS. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and

arrange them in the correct order.**Answer:** Explanation:ExplanationReferences:
