NEW QUESTION: 1What stakeholder(s) must participate in the document elicitation result?**A.** Business analyst**B.** Business analyst and the business owner**C.** Business analyst and the key stakeholders**D.** Business analyst, business analysis team, and the key stakeholders**Answer: A**

NEW QUESTION: 2You need to install some patches on a Service guard node that is actively running in the cluster. Once the patch installation finishes, at least one of the patches will require a server reboot. Prior to starting the patch installation, you halt cluster activities on the node with the `cmha1tnodecommand`. Why do you need to do this?**A.** To prevent users from logging on**B.** To allow faster patch installation**C.** To prevent a system TOC panic**D.** To back up the system**Answer: D**

NEW QUESTION: 3Steven is a Scrum Master for three Scrum Teams building the same product and working from the same Product Backlog. Management wants to standardize how velocity is calculated across all three teams in order to identify which teams are high performing and which teams need more support. What would be the best two responses Steven could provide to management? (Choose two.)**A.** Providing incentives based on velocity can increase the Scrum Team's motivation to produce more value.**B.** Standardizing velocity across teams is a good way to understand which teams are producing the most value.**C.** Velocity is the amount of business functionality that a Scrum Team creates in a Sprint. It is unique to that team and used as an input to Sprint Planning.**D.** There is no direct relationship between velocity and value.**Answer: C, D****Explanation:** Working software is the primary measure of progress. Scrum is based on empirical process control theory where delivering working software frequently and measuring the impact helps the Product Owner maximize opportunity for the business to deliver value.

NEW QUESTION: 4A recent audit had revealed weaknesses in the process of deploying new servers and network devices. Which of the following practices could be used to increase the security posture during deployment? (Select TWO).**A.** Deploy a honeypot**B.** Penetration testing**C.** Implement an application firewall**D.** Disable unnecessary services**E.** Change default password**Answer: D, E**
