Topic 4, Case Study Overview Existing Environment A . Datum Corporation is a financial company that has two main offices in New York and Los Angeles. A. Datum has a subsidiary named Fabrikam, Inc that share, Los Angeles office. A . Datum is conducting an initial deployment. of Azure services to host new line-of business applications and is preparing to migrate its existing on-premises workloads to Azure. A Datum uses Microsoft Exchange Online (or email On-Premises Environment The on-premises workloads run on virtual machines hosted in a VMware vSphere 6 infrastructure. All the virtual machines and members of an Active Directory forest named adatum.com and run Windows Server 2016. The New York office uses an IP address space of 10.0.0.0/16 The Los Angeles office uses an IP address space of 10.10.0.0/16. The offices connect by using a VPN provided by an ISP. Each office has one Azure ExpressRoute circuit that provides access to Azure services and Microsoft Online Services. Routing is implemented by using Microsoft peering. The New York office has a virtual machine named VM1 that has the vSphere console installed. Azure Environment You provision the Azure infrastructure by using the Azure portal. The infrastructure contains the resources shown in the following table. AG1 has two backend pools named Pool 11 and Pool12. AG2 has two backend pools named Pool21 and Pool22. Requirements Planned Changes A: Datum plans to migrate the virtual machines from the New York office to the East US Azure rec-on by using Azure Site Recovery. Infrastructure Requirements A: Datum identifies the following infrastructure requirements: * A new web app named App1 that will access third-parties for credit card processing must be deployed * A newly developed API must be implemented as an Azure function named App2. App2 will use a blob storage trigger. App2 must process new blobs immediately. * The Azure infrastructure and the on-premises infrastructure must be prepared for the migration of the VMware virtual machines to Azure. * The sizes of the Azure virtual machines that will be used to migrate the on-premises workloads must be identified, * All

migrated and newly deployed Azure virtual machines must be joined to the adatum.com domain.* AG1 must load balance incoming traffic in the following manner*
<http://corporate.adatum.com/video/>* will be load balanced across Pool11.*
<http://corporate.adatum.com/images/>* will be load balanced across Pool 12.* AG2 must load balance incoming traffic in the following manner.* <http://www.adatum.com> will be load balanced across Pool21.* <http://www.fabnkam.com> will be load balanced across Pool22.* ER1 must route traffic between the New York office and the platform as a service (PaaS) services in the East US Azure region, as long as ER1 is available.* ER2 must route traffic between the Los Angeles office and the PaaS services in the West US region, as long as ER2 is available.* ER1 and ER2 must be configured to fail over automatically Application Requirements App2 must be able to connect directly to the private IP addresses of the Azure virtual machines. App2 will be deployed directly to an Azure virtual network. Inbound and outbound communications to App1 must be controlled by using NSGs. Pricing Requirements A . Datum identities the following pricing requirements:* The cost of App1 and App2 must be minimized.* The transactional charges of Azure Storage accounts must be minimized.

NEW QUESTION: 2A. Option CB. Option DC. Option BD. Option A **Answer: D** Explanation: Reference:http://stuff.mit.edu/afs/sipb/project/vmdialup/lib/vmwareconsole/help/server/configvm_memory.htm

NEW QUESTION: 3 As of March, how long will the computers in each office remain supported by Microsoft? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation References: <https://www.windowscentral.com/whats-difference-between-quality-updates-and-feature-updates-windows-10> Topic 3A: Datum Case Study: Overview Existing Environment This is a case study Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Current Infrastructure A . Datum recently purchased a Microsoft 365 subscription. All user files are migrated to Microsoft 365. All mailboxes are hosted in Microsoft 365. The users in each office have email suffixes that include the country of the user, for example, [\[email protected\]](#) or user2#uk.adatum.com. Each office has a security information and event management (SIEM) appliance. The appliances come from three different vendors. A : Datum uses and processes Personally Identifiable Information (PII). Problem Statements Requirements A : Datum entered into litigation. The legal department must place a hold on all the documents of a user named User1 that are in Microsoft 365. Business Goals A : Datum wants to be fully compliant with all the relevant data privacy laws in the regions where it operates. A : Datum wants to minimize the cost of hardware and software whenever possible. Technical Requirements A : Datum identifies the following technical requirements:* Centrally perform log analysis for all offices.* Aggregate all data from the SIEM appliances to a central cloud repository for later analysis.* Ensure that a SharePoint administrator can identify who accessed a specific file stored in a document library.* Provide the users in the finance department with access to Service assurance information in Microsoft

Office365.*Ensure that documents and email messages containing the PII data of European Union (EU) citizens are preserved for 10 years.*If a user attempts to download 1,000 or more files from Microsoft SharePoint Online within 30 minutes, notify a security administrator and suspend the user's user account.*A security administrator requires a report that shows which Microsoft 365 users signed in Based on the report, the security administrator will create a policy to require multi-factor authentication when a sign in is high risk.*Ensure that the users in the New York office can only send email messages that contain sensitive US. PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitiveU.S. PII data.
