NEW QUESTION: 1You have a computer that runs Windows 7.Windows Update settings are configured as shown in the exhibit. (Click the Exhibit button.)You discover that standard users are never notified when updates are available.You need to ensure that standard users are notified when updates are available.What should you do?Exhibit:**A.** Select Give me recommended updates the same way I receive important updates.**B.** Select Allow all users to install updates on this computer.**C.** Change the Startup Type for the Windows Update service to Automatic.**D.** Specify an intranet Microsoft update service location in Group Policy.**Answer: B**
Explanation:Change how Windows installs or notifies you about updates You can set Windows to automatically install important and recommended updates or to install important updates only. Important updates provide significant benefits, such as improved security and reliability. Recommended updates can address noncritical problems and help enhance your computing experience. Optional updates are not downloaded or installed automatically. If you don't want updates to be installed automatically, you can choose to be notified when updates apply to your computer instead. Then, you can download and install them yourself, or you can set Windows to automatically download updates, and then notify you so you can install them yourself.

NEW QUESTION: 2An employee authenticates using their corporate laptop and runs the dissolvable onguard agent to send a health check back the Policy Manager. Based on the health of the device a VLAN is assigned to the corporate laptop.Which licenses are consumed in this
