The language of our 72301X exam questions are easy to follow and the pass rate of our 72301X learning guide is as high as 99% to 100%, Even if you have bought our Avaya Aura® Communication Applications Support Certified Exam **Exam 72301X Torrent** demo questions, you are still available to enjoy our online workers' service.

**NEW QUESTION: 1** "An element of information, from a transaction to an entire system, is appropriately entered, developed, changed, or used with proper authority." Which of the following element of integrity supports this statement? **A. Complete B. Timely C. Accurate D. Authorized**  
**Answer: D**

**NEW QUESTION: 2** EIGRP Simulation After adding Interior router, no routing updates are being exchanged between Perimeter and the new location. All other inter connectivity and Internet access for the existing locations of the company are working properly. The Task is to identify the fault(s) and correct the router configurations to provide full connectivity between the routers. Access to the router CLI can be gained by clicking on the appropriate host. All passwords on all routers are cisco. IP Address are listed in the chart below **A. Click here to answer this question**  
**Answer: A** Explanation: Explanation/Reference: Commands First we should check the configuration of the Interior Router. Click the console PC "F" and enter the following commands. Interior> enable Password: cisco Interior# show running-config Building configuration... Current configuration : 770 bytes! version 12.2 no service timestamps log datetime msec no service timestamps debug datetime msec no service password-encryption! hostname Interior! enable secret 5 \$1\$mERr\$hX5rVt7rPNoS4wqbXKX7m0! interface FastEthernet0/0 ip address 192.168.77.34 255.255.255.252 duplex autospeed auto! interface FastEthernet0/1 ip address 192.168.60.65 255.255.255.240 duplex autospeed auto! interface FastEthernet1/0 ip address 192.168.60.81 255.255.255.240 duplex autospeed auto! router eigrp 22 network 192.168.77.0 network 192.168.60.0 no auto-summary! ip classless! line con 0 line vty 0 4 login! end Interior# From the output above, we know that this router was wrongly configured with an autonomous number (AS) of 22. When the AS numbers among routers are mismatched, no adjacency is formed. (You should check the AS numbers on other routers for sure) To solve this problem, we simply re-configure router Interior router with the following commands: Interior# conf t Interior(config)# no router eigrp 22 Interior(config)# router eigrp 222 Interior(config-router)# network 192.168.60.0 Interior(config-router)# network 192.168.77.0 Interior(config-router)# no auto-summary Interior(config-router)# end Interior# copy running-config startup-config Second we should check the configuration of the Perimeter Router. Click the console PC "G" and enter the following commands. Perimeter> enable Password: cisco Perimeter# show running-config Building configuration... Current configuration : 1029 bytes! version 12.2 no service timestamps log datetime msec no service timestamps debug datetime msec no service password-encryption! hostname Perimeter! enable secret 5 \$1\$mERr\$hX5rVt7rPNoS4wqbXKX7m0! interface FastEthernet0/0 ip address 192.168.77.33 255.255.255.252 duplex autospeed auto! interface Serial0/0 ip address 192.168.36.13

```
255.255.255.252clock rate 64000!interface Serial0/1ip address 192.168.60.25 255.255.255.252
clock rate 64000!interface Serial1/0ip address 198.0.18.6 255.255.255.0!interface Serial1/1no ip
addressshutdown!interface Serial1/2no ip addressshutdown!interface Serial1/3no ip address
shutdown!router eigrp 222network 192.168.36.0network 192.168.60.0network 192.168.85.0
network 198.0.18.0no auto-summary!ip classlessip route 0.0.0.0 0.0.0.0 198.0.18.5!line con 0line
vty 0 4login!endPerimeter#Notice that it is missing a definition to the network Interior.
Therefore we have to add it so that it can recognize Interior router Perimeter# conf t
Perimeter(config)# router eigrp 222Perimeter(config-router)# network 192.168.77.0
Perimeter(config-router)# endPerimeter# copy running-config startup-configNow the whole
network will work well. You should check again with ping command from router Interior to
other routers!
```

**NEW QUESTION: 3**Which layer of the HPE OneView architecture for the software-defined data center (SDDC) implements the software-defined abstractions that map to resources needed to support application and service requests?**A. ApplicationB. StorageC. InfrastructureD. Control**

**Answer: C**

**NEW QUESTION: 4**What is the type of monitoring data (for Amazon EBS volumes) which is available automatically in 5- minute periods at no charge called?**A. LocalB. PrimaryC. BasicD. Detailed**

**Answer: C**
