NEW QUESTION: 3 A major customer has asked you to set up his AWS infrastructure so that it will be easy to recover in the case of a disaster of some sort. Which of the following is important when thinking about being able to quickly launch resources in AWS to ensure business continuity in case of a disaster? **A.** Regularly run your servers, test them, and apply any software updates and configuration changes. **B.** All items listed here are important when thinking about disaster recovery. **C.** Create and maintain AMIs of key servers where fast recovery is required. **D.** Ensure that you have all supporting custom software packages available in AWS. **Answer: B**
Explanation: In the event of a disaster to your AWS infrastructure you should be able to quickly launch resources in Amazon Web Services (AWS) to ensure business continuity. The following are some key steps you should have in place for preparation: 1 . Set up Amazon EC2 instances to replicate or mirror data. 2 . Ensure that you have all supporting custom software packages available in AWS. 3 . Create and maintain AMIs of key servers where fast recovery is required. 4 . Regularly run these servers, test them, and apply any software updates and configuration changes. 5 . Consider automating the provisioning of AWS resources.
