Trey Research has three offices. The offices are located in Seattle, Los Angeles, and Toronto. Trey Research has two data centers. The data centers are located in Los Angeles and Toronto. **Existing Environment** The network contains a single-domain Active Directory forest named treyresearch.com. The network contains switches that support either SNMPv1 or SNMPv2. The forest contains 100 physical servers that run Windows Server 2008 R2 Service Pack 1 (SP1). The relevant servers are configured as shown in the following table. All of the System Center 2012 servers use Server5 as a database server. All of the VMM components in the production environment are installed on Server1. Server1 is located in the Los Angeles data center. Ten virtual machine hosts are located in the Toronto data center and 90 virtual machine hosts are located in the Los Angeles data center. Server9 is used to manage three virtualization hosts in a lab environment. **Requirements** Planned Changes Trey Research plans to implement the following changes: Upgrade Server9 to VMM 2012. Discover and monitor network switches by using Operations Manager. Grant the network technicians the required permissions to configure the network fabric. Install a System Center 2012 Service Manager management server on Server7 and a Service Manager data warehouse management server on Server8. Provide external access to the Virtual Machine Manager Self-Service Portal (VMMSSP) by using the names ssp.treyresearch.com and vmm.treyresearch.com. **Private Cloud Infrastructure Requirements** Trey Research identifies the following requirements for the private cloud infrastructure: Integrate VMM 2012 and Operations Manager 2012. Ensure that all VMM 2012 components are highly available. Ensure that virtual machines use a MAC address from a custom MAC address pool. Ensure that Hyper-V hosts can be deployed to bare-metal computers from Server6. Control the placement of virtual machines based on the performance data gathered by Operations Manager. **Private Cloud Compliance Requirements** Trey Research identifies the following requirements for compliance in the private cloud infrastructure: Ensure

that updates on the Hyper-V hosts can be remediated. Generate the compliance status of all the servers in the fabric. Ensure that update baselines for all of the servers in the fabric are created. Private Cloud Services Requirements. Trey Research identifies the following requirements for managing services in the private cloud: Users in the human resources department must be able to create virtual machines that have two CPUs and 4 GB RAM by using the VMMSSP. Users in the marketing department must be able to create new virtual machines that will be hosted in the Toronto office. The virtual machine templates for the marketing department users must be stored in the Toronto office.
