**NEW QUESTION: 1A. Option FB. Option AC. Option CD. Option BE. Option DF. Option E**

**Answer: A,D,E**Explanation:ExplanationThe ASA has to check the packet against access lists and perform other tasks to determine if the packet is allowed or denied. To perform this check, the first packet of the session goes through the " session management path," and depending on the type of traffic, it might also pass through the "control plane path."The session management path is responsible for the following tasks:+ Performing the access list checks+ Performing route lookups+ Allocating NAT translations (xlates)+ Establishing sessions in the "fast path"
