NEW QUESTION: 1Which two port security features are dependent on the DHCP snooping database? (Choose two.)**A.** IP source guard**B.** storm control**C.** dynamic ARP inspection**D.** MAC limiting**Answer: A,C****Explanation:**ExplanationB: Dynamic ARP inspection (DAI) prevents Address Resolution Protocol (ARP) spoofing attacks. ARP requests and replies are compared against entries in the DHCP snooping database, and filtering decisions are made on the basis of the results of those comparisons.C: IP source guard mitigates the effects of IP address spoofing attacks on the Ethernet LAN. With IP source guard enabled, the source IP address in the packet sent from an untrusted access interface is validated against the SourceDSN MAC address in the DHCP snooping database. The packet is forwarded if the source IP-MAC binding is valid; if the binding is not valid, the packet is discarded. You enable IP source guard on a VLAN.EX Series switches support IPv6 source guard also.References:

NEW QUESTION: 2Which human resources should be available before you begin testing, so that you can decide how to use them effectively?**A.** Network admin, DBA, and System admins**B.** Hardware, software specialists, and human resources**C.** VUsers, end user**D.** VUsers, load generators, testers**Answer: C**
