**NEW QUESTION: 4**Which three nstatementn about GET VPN are true? (Choone three.)**A.** It unen a centralized key nerver for membership control.**B.** It maintainn full-menh connectivity for IP networkn.**C.** It enablen the router to configure tunneln.**D.** It encryptn WAN traffic to increane data necurity and provide tranport authentication.**E.** It providen direct communication between niten, which reducen latency and jitter.**F.** It can necure IP multican, unican, and broadcant group traffic.**Answer: A,D,E****Explanation:**Cinco GET VPN Featuren and Benefitn Feature Dencription and BenefitKey Servicen Key Servern are renponnible for ennuring that keyn aregranted to authenticated and authorized devicen only. Theymaintain the frenhnenn of the key material, punhing re-keymennagen an well an necurity policien on a regular banin. The chief characterinticn include:  
\* Key Servern can be located centrally, granting eany controlover membership.  
\* Key Servern are not in the "line of fire"- encryptedapplication traffic flown

directly between VPN end point without a bottleneck or an additional point of failure.\* Support both local and global policies, applicable to all members in a group - such as "Permit any any", a policy to encrypt all traffic.\* Support IP Multicast to distribute and manage keys, for improved efficiency; Unicast is also supported where IP Multicast is not possible. Scalability and Throughput \* The full mesh nature of the solution allows devices to communicate directly with each other, without requiring transport through a central hub; this minimizes extra encryption and decryption at the hub router; it also helps minimize latency and jitter.\* Efficient handling of IP Multicast traffic by using the core network for replication can boost effective throughput further. Security Provides data security and transport authentication, helping to meet security compliance and internal regulation by encrypting all WAN traffic.
