1. terraform {
2. required_version = ">= 0.12"
3. }
A. versions before Terraform 0.12 were not approved by HashiCorp to be used in production
B. Terraform 0.12 introduced substantial changes to the syntax used to write Terraform configuration
C. this ensures that all Terraform providers are above a certain version to match the application being deployed
D. the user wants to ensure that the application being deployed is a minimum version of 0.12
Answer: B
Explanation: You can use required_version to ensure that a user deploying infrastructure is using Terraform 0.12 or greater, due to the vast number of changes that were introduced. As a result, many previously written configurations had to be converted or rewritten.
