**NEW QUESTION: 1**Adrian is the project manager of the NHP Project. In her project there are several work packages that deal with electrical wiring. Rather than to manage the risk internally she has decided to hire a vendor to complete all work packages that deal with the electrical wiring. By removing the risk internally to a licensed electrician Adrian feels more comfortable with project team being safe. What type of risk response has Adrian used in this example?**A.** Avoidance**B.** Transference**C.** Acceptance**D.** Mitigation**Answer: B**

**NEW QUESTION: 2**Which feature of an entity object would you use to enforce that an attribute value is required?**A.** Enforcing that an attribute value is required is implemented only in a view object.**B.** Select the attribute's Primary Key attribute setting.**C.** Set the attribute's Updatable attribute setting to Always.**D.** Select the attribute's Mandatory attribute setting.**E.** Set the attribute's Updatable attribute setting to Never.**Answer: D**Explanation:Explanation/Reference: Make an Attribute Mandatory by selecting the Mandatory checkbox if the field is required. The mandatory property is enforced during entity-level validation at runtime (and not when the attribute validators are run).Reference: <http://docs.oracle.com/middleware/1213/adf/develop/adf-bc-entity-objects.htm#ADFFD191>

**NEW QUESTION: 3**You are responsible for security at a company that specializes in e-commerce. You realize that given the high volume of Web traffic, there is a significant chance of someone being able to breach your perimeter. You want to make sure that should this occur, you can redirect the attacker away from sensitive data. How would you best accomplish this?**A.** Implement a stateful packet inspection firewall.**B.** Implement a network based IDS.**C.** Implement a passive IDSD.**D.** Implement a honey pot.**Answer: D**
