NEW QUESTION: 1A. 0B. 1C. 2D. 3Answer: AExplanation:ExplanationThe AWS Documentation mentions the following Restores the previously deployed app version. For example, if you have deployed the app three times and then run Rollback, the server will serve the app from the second deployment. If you run Rollback again, the server will serve the app from the first deployment. By default, AWS OpsWorks Stacks stores the five most recent deployments, which allows you to roll back up to four versions. If you exceed the number of stored versions, the command fails and leaves the oldest version in place.For more information on Opswork app deployment, please visit the below U RL:*
