In contemporary society, information is very important to the development of the individual and of society AZ-700 practice test, Free demo for your trial & satisfying customer service.

But this kind of situations is rare, which reflect that our AZ-700 practice materials are truly useful, So we serve as a companion to help you resolve any problems you may encounter in your review course.

There is a lot of data to prove that our AZ-700 practice guide has achieved great success, So our AZ-700 practice materials are perfect paragon in this industry full **AZ-700 Premium Files** of elucidating content for exam candidates of various degrees to use for reference.

What's more, you still have another choice, if you don' t want to choose a refund **AZ-700 Premium Files** or have another exam, you can choose to ask another exam damp for free from us, we are still here and will try our best to give you the most effective help.

Only through qualification examination, has obtained [C S43 2023 100% Accuracy](#) the corresponding qualification certificate, we will be able to engage in related work, so the AZ-700 test torrent is to help people in a relatively short period of time a great important tool to pass the qualification test.

NEW QUESTION: 1You are developing an Azure web app named WebApp1. WebApp1 uses an Azure App Service plan named Plan1 that uses the B1 pricing tier.You need to configure WebApp1 to add additional instances of the app when CPU usage exceeds 70 percent for 10 minutes.Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Answer:** Explanation:Explanation:Box 1: From the Scale up (App Service Plan) settings blade, change the pricing tier The B1 pricing tier only allows for 1 core. We must choose another pricing tier.Box 2: From the Scale out (App Service Plan) settings blade, enable autoscale1. Log in to the Azure portal at <http://portal.azure.com>1. Navigate to the App Service you would like to autoscale.2. Select Scale out (App Service plan) from the menu3. Click on Enable autoscale. This activates the editor for scaling rules.Box 3: From the Scale mode to Scale based on metric, add a rule, and set the instance limits.Click on Add a rule. This shows a form where you can create a rule and specify details of the scaling.References:

NEW QUESTION: 2Bob has been hired to perform a penetration test on XYZ.com. He begins by looking at IP address ranges owned by the company and details of domain name registration. He then goes to News Groups and financial web sites to see if they are leaking any sensitive information of have any technical details online. Within the context of penetration testing methodology, what phase is Bob involved with?**A.** Passive information gathering**B.** Attack phase**C.** Active information gathering**D.** Vulnerability Mapping**Answer: A**Explanation:He is gathering information and as long as he doesn't make contact with any of the targets systems he is considered gathering this information in a passive mode.

NEW QUESTION: 3You have an Azure subscription named Subscription1. Subscription1 contains the resources in the following table. In Azure, you create a private DNS zone named adatum.com. You set the registration virtual network to VNet2. The adatum.com zone is configured as shown in the following exhibit. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer: Explanation: Explanation
Box 1: No Azure DNS provides automatic registration of virtual machines from a single virtual network that's linked to a private zone as a registration virtual network. VM5 does not belong to the registration virtual network though.
Box 2: No Forward DNS resolution is supported across virtual networks that are linked to the private zone as resolution virtual networks. VM5 does belong to a resolution virtual network.
Box 3: Yes VM6 belongs to registration virtual network, and an A (Host) record exists for VM9 in the DNS zone. By default, registration virtual networks also act as resolution virtual networks, in the sense that DNS resolution against the zone works from any of the virtual machines within the registration virtual network.
