**D.** Set Order type in price model to Sales Quotation and Pricing method in Version to Attribute based.  
**Answer: B**

**NEW QUESTION: 2** Which two statements are true regarding the WebLogic domain?  
**A.** A WebLogic domain can have more than one Administration server.  
**B.** A WebLogic domain can have at the most one cluster.  
**C.** Each WebLogic domain is associated with a different Node Manager.  
**D.** A WebLogic domain can cross multiple physical machines.  
**E.** A WebLogic domain has at least one WebLogic server.  
**Answer: D, E**  
**Explanation:** B: A domain consists of one or more WebLogic Server instances (and their associated resources) that you manage with a single Administration Server. D: In a domain, server instances other than the Administration Server are referred to as Managed Servers. Managed Servers host the components and associated resources that constitute your applications. Incorrect: Not A: Each WebLogic Server domain must have one server instance that acts as the Administration Server. Not C: A domain can include multiple WebLogic Server clusters and non-clustered WebLogicServer instances. Not E: A Node Manager process is not associated with a specific WebLogic domain but with a machine. You can use the same Node Manager process to control server instances in any WebLogic Server domain, as long as the server instances reside on the same machine as the Node Manager process. Node Manager must run on each computer that hosts WebLogic Server instances-whether Administration Server or Managed Server-that you want to control with Node Manager. Reference: Overview of WebLogic Server Domains

**NEW QUESTION: 3** You have an Azure subscription that contains the virtual networks shown in the following table. You create an Azure Cosmos DB account as shown in the exhibit. (Click the Exhibit tab.) For each of the following statements, select yes if the statement is true. Otherwise, select no.  
**Answer:** Explanation: Explanation
