Explanation: To access data sources on premises from your logic apps, you can create a data

gateway resource in Azure so that your logic apps can use the on-premises connectors.Box 1: From an on-premises computer, install an on-premises data gateway.Before you can connect to on-premises data sources from Azure Logic Apps, download and install the on-premises data gateway on a local computer.Box 2: From the Azure portal, create an on-premises data gateway Create Azure resource for gatewayAfter you install the gateway on a local computer, you can then create an Azure resource for your gateway. This step also associates your gateway resource with your Azure subscription.* Sign in to the Azure portal. Make sure you use the same Azure work or school email address used to install the gateway.On the main Azure menu, select Create a resource > Integration > On-premises data gateway.* On the Create connection gateway page, provide this information for your gateway resource.* To add the gateway resource to your Azure dashboard, select Pin to dashboard. When you're done, choose Create. Box 3: From the Logic Apps Designer in the Azure portal, add a connector After you create your gateway resource and associate your Azure subscription with this resource, you can now create a connection between your logic app and your on-premises data source by using the gateway.* In the Azure portal, create or open your logic app in the Logic App Designer.* Add a connector that supports on-premises connections, for example, SQL Server.* Set up your connection.
