**NEW QUESTION: 1**Those examples of poetic justice that occur in medieval and Elizabethan literature, and that seem so satisfying, have encouraged a whole school of twentieth-century scholars to "find" further examples. In fact, these scholars have merely forced victimized character into a moral framework by which their injustices inflicted on them are, somehow or other, justified. Such scholars deny that the sufferers in a tragedy are innocent; they blame the victims themselves for their tragic fates. Any misdoing is enough to subject a character to critical whips. Thus, there are long essays about the misdemeanors of Webster's Duchess of Malfi, who defied her brothers, and the behavior of Shakespeare's Desdemona, who disobeyed her father. Yet it should be remembered that the Renaissance writer Matteo Bandello strongly protests the injustice of the severe penalties issued to women for acts of disobedience that men could, and did, commit with virtual impunity. And Shakespeare, Chaucer, and Webster often enlist their readers on the side of their tragic heroines by describing injustices so cruel that readers cannot but join in protest. By portraying Griselda, in the Clerk's Tale, as a meek, gentle victim who does not criticize, much less rebel against the prosecutor, her husband Walter, Chaucer incites readers to espouse Griselda's cause against Walter's oppression. Thus, efforts to supply historical and theological rationalization for Walter's persecutions tend to turn Chaucer's fable upside down, to deny its most obvious effect on reader's sympathies. Similarly, to assert that Webster's Duchess deserved torture and death because she chose to marry the man she loved and to bear their children is, in effect to join forces with her tyrannical brothers, and so to confound the operation of poetic justice, of which readers should approve, with precisely those examples of social injustice that Webster does everything in his power to make readers condemn. Indeed, Webster has his heroine so heroically lead the resistance to tyranny that she may well inspire members of the audience to imaginatively join forces with her against the cruelty and hypocritical morality of her brothers. Thus Chaucer and Webster, in their

different ways, attack injustice, argue on behalf of the victims, and prosecute the persecutors. Their readers serve them as a court of appeal that remains free to rule, as the evidence requires, and as common humanity requires, in favor of the innocent and injured parties. For, to paraphrase the noted eighteenth-century scholar, Samuel Johnson, despite all the refinements of subtlety and the dogmatism of learning, it is by the common sense and compassion of readers who are uncorrupted by the characters and situations in mere verbal and Elizabethan literature, as in any other literature, can best be judged. It can be inferred from the passage that the author considers Chaucer's Grisselda to be **A.** an innocent victim **B.** a rebellious daughter **C.** a strong individual **D.** a sympathetic judge **E.** an imprudent person **Answer: A**

**NEW QUESTION: 2** Your network consists of one Active Directory domain named contoso.com. The domain contains three Windows Server 2008 servers named Server1, Server2, and Server3. Server1 runs Active Directory Certificate Services (AD CS) and is configured as an enterprise root certification authority. Server2 hosts an internal Web site. Users currently connect to the Web site by using the URL https://server2.contoso.com. You plan to replicate the Web site from Server2 to Server3. You need to recommend a solution to enable users to connect to the Web site through HTTPS on either Server2 or Server3 by using a single URL. The solution must meet the following requirements: - Users must be able to use the https://www.contoso.com URL to connect to the Web site. - Incoming connections must be dynamically balanced between Server2 and Server3. What should you recommend? **A.** Add both servers to a failover cluster. Issue a Web server certificate for server2.contoso.com and install the certificate on Server2. Issue a Web server certificate for server3.contoso.com and install the certificate on Server3. **B.** Add both servers to a Network Load Balancing cluster. Export the Web server certificate on Server2 to Server3. **C.** Add both servers to a Network Load Balancing cluster. Issue a Web server certificate for www.contoso.com. Install the certificate on Server2 and Server3. **D.** Add both servers to a failover cluster. Issue a Web server certificate for www.contoso.com. Install the certificate on Server2. **Answer: C** Explanation: Explanation/Reference: To connect to the Intranet website through HTTPS on either Server2 or Server3 by using a single URL, https://www.contoso.com, add both servers to a Network Load Balancing cluster so that the client requests can be load balanced between both the servers and both the servers should be able to serve the request. You should not use a failover cluster because you don't want another server to support if one of the servers fails. Next, to make a secure intranet connection, you need to issue a web server certificate for www.contoso.com, which is the default web URL and includes both the intranet servers. You should not issue a Web server certificate for server2.contoso.com or server3.contoso.com because that will take care of only one web server whereas the common URL will take care of both the servers. Next, you need to install the certificate on both Server2 and Server3 because to use certificates they must be installed on both the servers.
