NEW QUESTION: 3 You have a stub OSPF area running in your network. Your supervisor has asked you to build a virtual link across this area to connect new equipment acquired in a recent ISP acquisition. Which statement is correct about this scenario? **A.** Type 5 LSAs would be blocked in a stub area. **B.** Type 5 LSAs would be converted to type 7 LSAs. **C.** Type 5 LSAs would be seen only in the newly attached area. **D.** Type 5 LSAs would carry external information across your transit area to the backbone. **Answer: A**

NEW QUESTION: 4 Auditors try to identify predictable relationships when using analytical procedures. Relationships involving transactions from which of the following accounts most likely would yield the highest level of evidence? **A.** Advertising expense. **B.** Accounts payable. **C.** Payroll expense. **D.** Accounts receivable. **Answer: C** Explanation: Explanation/Reference: Explanation: Choice "D" is correct. Auditors try to identify predictable relationships when using analytical review procedures. Payroll expense is predictable because it is based on objective information (number of employees and pay rates). It can generally be computed directly by the auditor. Choices "A", "B", and "C" are incorrect. These account balances are less predictable because they are affected by other factors. Payable and receivable balances can be affected by

cash payments or receipts; advertising expense is subject to management discretion.
