I am very grateful to what they did for me.

**NEW QUESTION: 1** Refer to the exhibit. An admin wants to bring online a new leaf node into their ACI fabric. Before registering the leaf node, the admin checks the current status and sees this output. Which option is the reason for the admin to see this output? **A.** This output is expected until the admin registers the leaf node and assigns it a role. **B.** The DHCP server running on the APIC has failed and thus the leaf node has not been able to obtain an IP address. **C.** The leaf node is yet to be physical connected to the fabric. **D.** This output is expected until the admin registers the leaf node with an ID and name. **E.** The wrong catalog firmware is running on the APIC. **Answer: D**

**NEW QUESTION: 2** Which two statements about IP SLAs are true? (Choose two.) **A.** Data can be collected with a physical probe. **B.** They are used primarily in the distribution layer. **C.** Statistics are collected and stored in the RID. **D.** Data for the delay performance metric can be collected both one-way and round-trip. **E.** They are Layer 2 transport independent. **Answer: B, E**

**NEW QUESTION: 3** You administer Windows 10 Enterprise client computers in your company network. A computer that is used by non-administrator users has a directory named C:Folder1. A shared collection of Microsoft Excel files is stored in the C:Folder1 directory, with non-administrator users being granted modify permissions to the directory. You discover that some files have been incorrectly modified by a user. You need to determine which users are making changes to the files in the directory. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point. **A.** Set local policy: Computer Configuration > Windows Settings > Security Settings > Local Policies > Audit Policy > Audit object access to Failure. **B.** From the Auditing Entry for Folder, set the Principal to Everyone, and then set the Type to Success for the Modify permission. **C.** From the Auditing Entry for Folder1, set the Principal to Guests, and then set the Type to Failure for the Modify permission. **D.** From the Auditing Entry for Folder1, set the Principal to Everyone, and then set the Type to Failure for the Modify permission. **E.** Set local policy: Computer Configuration > Windows Settings > Security Settings > Local Policies > Audit Policy > Audit object access to Success. **F.** From the Auditing Entry for Folder1, set the Principal to Guests, and then set the Type to Success for the Modify permission. **Answer: B, E**
