NEW QUESTION: 1The Open Web Application Security Project (OWASP) Top Ten list of risks during the past several years. The following items have been on the list for many year. What of the choices below represent threats that have been at the top of the list for many years?**A.** SQL injection and Cross Site Scripting attacks**B.** Cross Site Scripting and Security Misconfigurations attacks**C.** SQL Injection and Weak Authentication and Session Management attacks**D.** Cross Site Scripting and Dynamic Unicode injection attacks**Answer: A****Explanation:**SQL injection and other database related raw content injections with LDAP,XML through dynamic SQL queries indicate the highest risks to information systems with web and database tiered systems. Injection flaws, such as SQL, OS, and LDAP injection occur when untrusted data is sent to an interpreter as part of a command or query. The attacker's hostile data can trick the interpreter into executing unintended commands or accessing data without proper authorization.XSS flaws occur whenever an application takes untrusted data and sends it to a web browser without proper validation or escaping. XSS allows attackers to execute scripts in the victim's browser which can hijack user sessions, deface web sites, or redirect the user to malicious sites. Several organizations have developed frameworks for secure web development. One of the most common is the Open Web Application Security Project (OWASP). OWASP has several guides available for web application development including:Development GuideCode Review GuideTesting GuideTop Ten web application security vulnerabilitiesOWASP MobileGiven the prevalence of web-based and cloud-based solutions, OWASP provides an accessible and thorough framework with processes for web application security. The information security professional should be familiar with the "top ten" web application vulnerabilities and also how to mitigate them.The following answers are incorrect:Cross Site Scripting and Dynamic Unicode injection attacksSQL Injection and Weak Authentication and Session Management attacksCross Site Scripting and Security Misconfigurations attacksThe following reference(s) were/was used to create this question:Open Web Application Security Project (OWASP) Top Ten List.andHernandez CISSP, Steven (2012-12-21). Official (ISC)2 Guide to the CISSP CBK, Third Edition ((ISC)2 Press) (Kindle Locations 12878-12891). Auerbach Publications. KindleEdition.
