If you are unlucky to fail C_S4CPB_2408 exam for the first time, we will give you a full refund of the cost you purchased our dump to make up your loss, We always be here for you with 24/7 service.

In order to provide the most authoritative and effective C_S4CPB_2408 exam software, the IT elite of our Estruturit study C_S4CPB_2408 exam questions carefully and collect the most reasonable answer analysis.

they are already convinced that getting a C_S4CPB_2408 certification can help them look for a better job, For your information, the passing rate of our C_S4CPB_2408 study questions is over 98% up to now.

NEW QUESTION: 1You are developing a web page that consumes a Windows Communication Foundation(WCF) service. The page includes the following code segment.
`var xhr = new XMLHttpRequest();`
The page uses the `xhrHandler()` method to listen for changes to the request status of the WCF service calls. It uses the `xmlToJavaScript()` method to convert the response from the WCF service to a JavaScript object. The `xhrHandler()` method must be called automatically each time the request status changes. You need to add the event handler to the request object. Which line of code should you use?
A. `xhr.onCallback = xhrHandler;`
B. `xhr.onreadystatechange = xhrHandler;`
C. `xhr.readyState = xhrHandler;`
D. `xhr.status = xhrHandler;`
Answer: B
Explanation: `onreadystatechange`: Sets or retrieves the event handler for asynchronous requests. Specifies a reference to an event handler for an event that fires at every state change `readyState` Returns the state of the object as follows:
* 0 = uninitialized - `open()` has not yet been called.
* 1 = open - `send()` has not yet been called.
* 2 = sent - `send()` has been called, headers and status are available.
* 3 = receiving - Downloading, `responseText` holds partial data (although this functionality is not available in IE [3])
* 4 = loaded - Done.
Example (assuming that there is a function handler):
`var oReq = getXMLHttpRequest();`
`if (oReq != null) {`
`oReq.open("GET", "http://localhost/test.xml", true);`
`oReq.onreadystatechange = handler;`
`oReq.send();`
Reference: XMLHttpRequest object; XMLHttpRequest (XHR)
