Also on-line APP version is stabler than software version.

NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. The domain contains six domain controllers. The domain controllers are configured as shown in the following table. The network contains a server named Server1 that has the Hyper-V server role installed. DC6 is a virtual machine that is hosted on Server1. You need to ensure that you can clone DC6. Which FSMO role should you transfer to DC2? **A.** Infrastructure master **B.** PDC emulator **C.** Rid master **D.** Domain naming master **Answer: B** Explanation:

Explanation/Reference: Explanation: The clone domain controller uses the security context of the source domain controller (the domain controller whose copy it represents) to contact the Windows Server 2012 R2 Primary Domain Controller (PDC) emulator operations master role holder (also known as flexible single master operations, or FSMO). The PDC emulator must be running Windows Server 2012 R2, but it does not have to be running on a hypervisor.

NEW QUESTION: 2 Which of the following is the weakest form of protection for an application that handles personally identifiable information (PII)? **A.** Security Assertion Markup Language (SAML) **B.** Multifactor authentication **C.** Transport Layer Security (US) **D.** Ron Rivest Cipher A (RC4) encryption **Answer: D**

NEW QUESTION: 3 Which of the following aspects of symmetric key encryption influenced the development of asymmetric encryption? **A.** Key distribution **B.** Processing power **C.** Complexity of the algorithm **D.** Volume of data **Answer: A** Explanation: Symmetric key encryption requires that the keys be distributed. The larger the user group, the more challenging the key distribution. Symmetric key cryptosystems are generally less complicated and, therefore, use less processing power than asymmetric techniques, thus making it ideal for encrypting a large volume of data. The major disadvantage is the need to get the keys into the hands of those with whom you want to exchange data, particularly in e-commerce environments, where customers are unknown, untrusted entities.
