**NEW QUESTION: 1** Within the Open Systems Interconnection (OSI) Reference Model, authentication addresses the need for a network entity to verify both **A.** The location of a remote communicating entity and the path through which communications are received. **B.** The identity of a remote communicating entity and the authenticity of the source of the data that are received. **C.** The authenticity of a remote communicating entity and the path through which communications are received. **D.** The identity of a remote communicating entity and the level of security of the path through which data are received. **Answer: B** Explanation: OSI model needs to know the source of the data and that it is who it says it is. Path it the data take is not cared about unless source routing is used. The level of security is not cared about inherently by the receiving node (in general) unless configured. A is the best option in this question.

**NEW QUESTION: 2** The opportunity of the meeting manager to sample a menu in advance of the event is called: **A.** Chefs option **B.** Chefs choice **C.** Chefs table **D.** Chefs test **Answer: D**

**NEW QUESTION: 3** Asset misappropriations have an effect on the liabilities and do also have an indirect effect on the equity account. **A.** True **B.** False **Answer: B**
