NEW QUESTION: 1What is the correct order of execution of Configuration rules for an attribute that has both Recommendation and Constraint rules written on it?**A.**

Recommendation,Constraint, Hiding, Recommended Item**B.** Constraint, Hiding, Recommendation, Recommended Item**C.** Hiding, Constraint, Recommendation, Recommended Item**D.** Constraint, Recommendation, Constraint, Hiding, Recommended Item **E.** Recommendation, Recommended Item, Hiding, Constraint**Answer: C**

NEW QUESTION: 2Sie bewerten, welche Geräte kompatibel sind.Wählen Sie für jede der folgenden Anweisungen Ja aus, wenn die Anweisung wahr ist. Andernfalls wählen Sie Nein. HINWEIS: Jede richtige Auswahl ist einen Punkt wert.**Answer:** Explanation:Explanation

NEW QUESTION: 3What is the primary difference between FTP and TFTP?**A.** Speed of negotiation**B.** Ability to automate**C.** TFTP is used to transfer configuration files to and from network equipment.**D.** Authentication**Answer: D**Explanation:TFTP (Trivial File Transfer Protocol) is sometimes used to transfer configuration files from equipments such as routers but the primary difference betweenFTP and TFTP is that TFTP does not require authentication. Speed and ability to automate are not important.Both of these protocols (FTP and TFTP) can be used for transferring files across theInternet. The differences between the two protocols are explained below:FTP is a complete, session-oriented, general purpose file transfer protocol. TFTP is used as a bare-bones special purpose file transfer protocol.FTP can be used interactively. TFTP allows only unidirectional transfer of files.FTP depends on TCP, is connection oriented, and provides reliable control. TFTP depends on UDP, requires less overhead, and provides virtually no control.FTP provides user authentication. TFTP does not. FTP uses well-known TCP port numbers: 20 for data and 21 for connection dialog. TFTP uses UDP port number 69 for its file transfer activity.The Windows NT FTP server service does not support TFTP because TFTP does not support authentication.Windows 95 and TCP/IP-32 for Windows for Workgroups do not include a TFTP client program.Ref: <http://support.microsoft.com/kb/102737>
