NEW QUESTION: 1Which of the following statements is the most accurate definition of "computer data bus connection"?**A.** The electronic design that allows any telephone application to connect to any computer application**B.** The electronic design that allows desktop CTI systems to connect to host-based systems**C.** The electronic design that connects host-based systems to PBXs**D.** The electronic design that determines how digital data is moved about within the computer**Answer: D**

NEW QUESTION: 2You are tuning a hyperparameter for an algorithm. The following table shows a data set with different hyperparameter, training error, and validation errors. Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.**Answer:** Explanation:ExplanationBox 1: 4Choose the one which has lower training and validation error and also the closest match. Minimize variance (difference between validation error and train error).Box 2: 5Minimize variance (difference between validation error and train error).Reference: <https://medium.com/comet-ml/organizing-machine-learning-projects-project-management-guidelines-2d2b85651>

NEW QUESTION: 3An organization's security policy states that users must authenticate using something you do. Which of the following would meet the objectives of the security policy?**A.** Password**B.** Signature analysis**C.** Swipe a badge**D.** Fingerprint analysis**Answer: B**Explanation: Authentication systems or methods are based on one or more of these five factors:Something you know, such as a password or PINSomething you have, such as a smart card, token, or identification device Something you are, such as your fingerprints or retinal pattern (often called biometrics) Something you do, such as an action you must take to complete authentication Somewhere you are (this is based on geolocation) Writing your signature on a document is 'something you do'. Someone can then analyze the signature to see if it matches one stored on record.
