NEW QUESTION: 1 Late static binding is used in PHP to:
A. Resolve undefined class names by automatically including needed files
B. Load dynamic libraries and extensions at runtime
C. Find proper method to call according to the call arguments
D. Use caller class information provided in static method call
Answer: D

NEW QUESTION: 2 The nurse is using Cognitive-Behavioral methods of pain control and knows that these methods can be expected to do all the following except:
A. provide benefit by restoring the client's sense of self-control.
B. help the client to control symptoms.
C. help the client actively participate in his or her own care.
D. completely relieve all pain.
Answer: D
Explanation: These interventions (strategies) help the client in all areas of client well-being. Focusing on perception and thought, cognitive techniques are designed to influence how one interprets events and bodily sensations. Basic Care and Comfort

NEW QUESTION: 3 ドラッグドロップユーザーがインターネットに接続できません。トラブルシューティングへの階層化されたアプローチと最下位の層から始めて、右側の適切なカテゴリに左側の各手順をドラッグします。
Answer: Explanation: Explanation: The question asks us to "begin with the lowest layer" so we have to begin with Layer 1: verify physical connection; in this case an Ethernet cable connection. For your information, "verify Ethernet cable connection" means that we check if the type of connection (crossover, straight-through,

rollover...) is correct, the RJ45 headers are plugged in, the signal on the cable is acceptable... Next we "verify NIC operation". We do this by simply making a ping to the loopback interface 127.0.0.1. If it works then the NIC card (layer 1, 2) and TCP/IP stack (layer 3) are working properly. Verify IP configuration belongs to layer 3. For example, checking if the IP can be assignable for host, the PC's IP is in the same network with the gateway... Verifying the URL by typing in your browser some popular websites like google.com, microsoft.com to assure that the far end server is not down (it sometimes make we think we can't access to the Internet). We are using a URL so this step belongs to layer 7 of the OSI model.
