NEW QUESTION: 1With CPsec enabled, which tunnel protocol is used between APs and Controllers in an Aruba environment?**A.** IPinIP**B.** EAP**C.** IPsec**D.** Mobile IPE. SSH**Answer: C**
Explanation:Explanation/Reference:Explanation:

NEW QUESTION: 2You have a Microsoft 365 subscription that contains a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.The tenant includes a user named User1 You enable Azure AD Identity Protection.You need to ensure that User1 can review the list in Azure AD Identity Protection of users nagged for risk.The solution must use the principle of least privilege.To which role should you add User1?**A.** Security reader**B.** Compliance administrator**C.** Reports reader**D.** Global administrator**Answer: B**

NEW QUESTION: 3次の表に示すAzure仮想ネットワークがあります。
VNet1からどの仮想ネットワークにピアリング接続を確立できますか？**A.** VNet2のみ**B.** VNet3およびVNet4のみ**C.** VNet2、VNet3、およびVNet4**D.** VNet2およびVNet3のみ**Answer: B**
Explanation:ExplanationReferences:
<https://docs.microsoft.com/en-us/azure/virtual-network/tutorial-connect-virtual-networks-portal> You can connect virtual networks to each other with virtual network peering. These virtual networks can be in the same region or different regions (also known as Global VNet peering). Once virtual networks are peered, resources in both virtual networks are able to communicate with each other, with the same latency and bandwidth as if the resources were in the same virtual network.Global VNet Peering is now generally available in all Azure public regions, excluding the China, Germany, and Azure Government regions.The address space is the most critical configuration for a VNet in Azure. This is the IP range for the entire network that will be divided into subnets. The address space can almost be any IP range that you wish (public or private). You can add multiple address spaces to a VNet. To ensure this VNet can be connected to other networks, the address space should never overlap with any other networks in your environment. If a VNet has an address space that overlaps with another Azure VNet or on-premises network, the networks cannot be connected, as the routing of traffic will not work properly.
