NEW QUESTION: 1You are the Test Manager of a new project that will have three formal levels of testing: unit, integration and system testing. The testing strategy you decide to adopt a blend of risk-based testing and reactive testing strategies. Which of the following answers describes the most consistent example of implementation of this test strategy during the execution of the system tests? **K2 1 credit**
A. Your test team autonomously performs some exploratory testing sessions and, at the very end of the system testing phase, it also executes more system tests under the guidance of a sample of users
B. Your test team executes exploratory tests following a session-based test management approach throughout the system test phase
C. Your test team executes system tests under the guidance of a sample of users throughout the system test phase
D. Your test team executes scripted tests designed and implemented before the execution of the system test phase, to cover the identified product risks. It also performs exploratory testing sessions throughout the system test phase
Answer: D

NEW QUESTION: 2Refer to the exhibit to the right. A customer has aggregated budgets for products by year and month. Actual data is stored at a more detailed transaction level and so a one-to-many relationship exists between the Budgets to Actuals table. Budgets have been assigned for all months of the current year, but there are only transactions up to the current month of October. There are transactions for products that were not assigned budgets. How can a developer remove the synthetic key automatically generated by QlikView and be able to analyze budgets and actuals by product, month, and year?
A. load the Actuals table, and when loading the Budgets table, rename fields Year and Month to BudgetYear and BudgetMonth
B. load the Actuals table, and when loading the Budgets table, use Outer Join to join the BudgetAmount field to the Actuals table
C. create a concatenated key of Product-Year-Month in both the Budgets and Actuals table and comment out the individual fields in the Budgets table
D. load the Actuals table, and when loading the Budgets table, use the Concatenate function to append the Budgets table to the Actuals table
Answer: D

NEW QUESTION: 3Which of the following steps should be taken to provide viable emergency financial procedures?
