The mail provides the links and after the client click on them the client can log in and gain the ADM-261 study materials to learn.

NEW QUESTION: 1A program with objectives that impact a large segment of the population receives negative commentary from organizations representing the public interest.What action should the program manager take first?**A.** Assess the risk of sustained negative media coverage.**B.** Review the stakeholder register to determine the ability of the affected stakeholder group(s) to affect program outcomes.**C.** Rework the stakeholder engagement plan to foster better relationships with the affected stakeholder groups.**D.** Discuss the issues with the governance board to determine next steps.**Answer: C**

NEW QUESTION: 2In which of the following phases of system development life cycle (SDLC) is contingency planning most important?**A.** Implementation**B.** Development/acquisition**C.** Operation/maintenance**D.** Initiation**Answer: D****Explanation:**Contingency planning requirements should be considered at every phase ofSDLC, but most importantly when a new IT system is being conceived. In the initiation phase, system requirements are identified and matched to their related operational processes, allowing determination of the system's appropriate recovery priority.Source: SWANSON, Marianne, & al., National Institute of Standards and Technology(NIST), NIST Special Publication 800-34, Contingency Planning Guide for InformationTechnology Systems, December 2001 (page 12).andThe Official ISC2 Guide to the CBK, Second Edition, Application Security, page 180-185

NEW QUESTION: 3A mature organization with legacy information systems has incorporated numerous new processes and dependencies to manage security as its networks and infrastructure are modernized. The Chief Information Office has become increasingly frustrated with frequent releases, stating that the organization needs everything to work completely, and the vendor should already have those desires built into the software product. The vendor has been in constant communication with personnel and groups within the organization to understand its business process and capture new software requirements from users. Which of the following methods of software development is this organization's configuration management process using?**A.** Agile**B.** Joint application development**C.** Waterfall**D.** SDL**Answer: A****Explanation:**In agile software development, teams of programmers and business experts work closely together, using an iterative approach.Incorrect Answers:B: The Microsoft developed security development life cycle (SDL) is designed to minimize the security-related design and coding bugs in software. An organization that implements SDL has a central security team that performs security functions.C: The waterfall model is a sequential software development processes, in which progress is seen as flowing steadily downwards through the phases of conception, initiation, analysis, design, construction, testing, production/implementation and maintenance.D: The vendor is still responsible for developing the solution, Therefore this is not an example of joint application development.References: BOOK pp. 371, 374https://en.wikipedia.org/wiki/Waterfall_model
