NEW QUESTION: 1You are developing a Microsoft ASP.NET application.You add a templated Web user control to a Web Form by using the following code fragment.<uc1:MyControl ID="MyControl1" runat="server"><HeaderTemplate><asp:Label ID="HeaderLabel" runat="server" /></HeaderTemplate><BodyTemplate><asp:TextBox ID="TemplateTextBox" runat="server" /></BodyTemplate></uc1:MyControl>You write the following code segment in the Web Form's code-behind file. (Line numbers are included for reference only.)02 Protected Sub Page_Load(ByVal sender As Object, ByVal e As EventArgs) 04 End SubYou need to modify the Visible property of the TemplateTextBox control from the Web Form's code-behind file as false.What should you do?**A.** Insert the following code segment at line 03. Dim templateTextBox As TextBox = DirectCast(MyControl1.FindControl("TemplateTextBox"), TextBox) templateTextBox.Visible = False**B.** Insert the following code segment at line 03. Dim templateTextBox As TextBox = DirectCast(MyControl1.FindControl("BodyTemplate/TemplateTextBox"), TextBox) templateTextBox.Visible = False**C.** Insert the following line of code at line 01. Protected TemplateTextBox As TextBox = Nothing Insert the following code segment at line 03. EnsureChildControls() TemplateTextBox.Visible = False**D.** Insert the following line of code at line 01. Protected TemplateTextBox As New TextBox() Insert the following line of code at line 03. TemplateTextBox.Visible = false**Answer: A**

NEW QUESTION: 2Your client wants to use Engage to render a dynamic recommendation on every page. The recommendation is to be rendered using a pagelet template that will be called by the outer page template using the <render:calltemplate> tag. The segment value of the current visitor will be passed to it. The rest of the page template consists of calls to additional cached pagelets that render the majority of the web page (for example, header, footer, navigation, and body). The total number of segments is 20 and each visitor can belong to only one segment. Which template caching strategy is the best solution from an efficiency point of view?**A.** having no SiteEntry wrapper and using an uncached page template that calculates the visitor's segment, which then calls a cached pagelet by using the<render:calltemplate>tag, specifying style="embedded" and passing the visitor's segment as cache criteria**B.** using an uncached wrapper that calculates the visitor's segment, and then calls a cached page template by using the<render:satellitepage>tag and passing in cand cid as cache arguments. This template, in turn, calls a cached pagelet by using the<render:calltemplate>tag, specifying style = "embedded" and passing the visitor's segment as cache criteria.**C.** having no SiteEntry wrapper and using an uncached page template that calculates the visitor's segment, which then calls a cached pagelet by using the<render:calitemplate>tag, specifying style="pagelet" and passing the visitor's segment as cache criteria**D.** using an uncached wrapper that calculates the visitor's segment, and then calls an uncached page template by using the<render:satellitepage>tag and passing in cand cid as cache arguments. This template, in turn, calls a cached pagelet by using the<render:calltemplate>tag, specifying style = "pagelet" and passing the visitor's segment as cache criteria. **E.** using an uncached wrapper that calculates the visitor's segment, and then calls a cached page template by using the <render-.satellitepage> tag and passing in c and cid as cache arguments. This template, in turn, calls a cached pagelet by using the <render:calltemplate> tag, specifying style="pagelet" and

passing the visitor's segment as cache criteria.**F.** having no SiteEntry wrapper and using a cached page template that calculates the visitors segment, which then calls a cached pagelet by using the<render:calltemplate>tag, specifying style="embedded" and passing the visitor's segment as cache criteria**Answer: B**

NEW QUESTION: 3Which of the following parameters are optional when configuring a BGP peer? (Select 2 answers)**A.** AS-number**B.** Password**C.** Description**D.** IP address**Answer: B,C**
