Now, Estruturit will help you to reduce the loss and you just need to use your spare time to do the TCC-C01 exam questions torrent and remember the main point of TCC-C01 pdf dumps.

But none of these ways are more effective than our TCC-C01 exam material, They are all responsible and patient to your questions.

**NEW QUESTION: 1** Huawei intelligent photovoltaic power plant monitoring and management system includes (). (Multiple Choice)  
**A.** Power station monitoring system  
**B.** Concentration Camp Center  
**C.** Production Management System  
**D.** Relay protection system  
**Answer: A,B,C**

**NEW QUESTION: 2** A. NetFlow version 8 and 9  
**B.** NetFlow version 5  
**C.** NetFlow version 9  
**D.** all versions of NetFlow  
**E.** NetFlow version 8  
**Answer: C**

**NEW QUESTION: 3** You are designing the security for a mission critical Azure SQL database named DB1. DB1 contains several columns that store Personally Identifiable Information (PII) data. You need to recommend a security solution that meets the following requirements:  
\* Ensures that DB1 is encrypted at rest  
\* Ensures that data from the columns containing PII data is encrypted in transit  
Which security solution should you recommend for DB1 and the columns?  
To answer, select the appropriate options in the answer area.  
**NOTE:** Each correct selection is worth one point.  
**Answer:** Explanation: Explanation  
DB1: Transparent Data Encryption  
Azure SQL Database currently supports encryption at rest for Microsoft-managed service side and client-side encryption scenarios. Support for server encryption is currently provided through the SQL feature called Transparent Data Encryption.  
Columns: Always encrypted  
Always Encrypted is a feature designed to protect sensitive data stored in Azure SQL Database or SQL Server databases. Always Encrypted allows clients to encrypt sensitive data inside client applications and never reveal the encryption keys to the database engine (SQL Database or SQL Server).  
**Note:** Most data breaches involve the theft of critical data such as credit card numbers or personally identifiable information. Databases can be treasure troves of sensitive information. They can contain customers' personal data (like national identification numbers), confidential competitive information, and intellectual property. Lost or stolen data, especially customer data, can result in brand damage, competitive disadvantage, and serious fines--even lawsuits.
