We are trying to offer the best high passing-rate 1Y0-231 training materials with low price, 100% Guarantee on Products, Price advantage is one of our company's core competitiveness.

NEW QUESTION: 1 Refer to the exhibit. Which two descriptions of the configuration are true? (Choose two.) **A.** The device is a primary vPC device. **B.** There are 55 vPC domains configured on the device. **C.** The device is a secondary vPC device. **D.** The STP is disabled on the vPC peer device. **E.** The device is configured to act as an active gateway for packets destined for the MAC address of the peer device. **Answer: B,D**

NEW QUESTION: 2 Which two technologies can encapsulate an IPv6 payload in an IPv4 packet for transmission across a network? (Choose Two) **A.** AToM **B.** L2TPv3 **C.** NAT-PT **D.** trunking **E.** ISATAP **Answer: C,E** Explanation: Explanation/Reference: Explanation: The Network Address Translator - Protocol Translator (NAT-PT) defines a set of network-layer translation mechanisms designed to allow nodes that only support IPv4 to communicate with nodes that only support IPv6, during the transition to the use of IPv6 in the Internet. NAT-PT provides IPv4/IPv6 protocol translation. It resides within an IP router, situated at the boundary of an IPv4 network and an IPv6 network. By installing NAT-PT between an IPv4 and IPv6 network, all IPv4 users are given access to the IPv6 network without modification in the local IPv4-hosts (and vice versa). Equally, all hosts on the IPv6 network are given access to the IPv4 hosts without modification to the local IPv6-hosts. This is accomplished with a pool of IPv4 addresses for assignment to IPv6 nodes on a dynamic basis as sessions are initiated across IPv4-IPv6 boundaries Reference: <http://www.ietf.org/rfc/rfc4966.txt> and http://www.cisco.com/en/US/prod/collateral/iosswrel/ps8802/ps6969/ps1835/prod_white_paper09186a008011ff51_ps6640_Products_White_Paper.html ISATAP tunneling (Intra-Site Automatic Tunnel Addressing Protocol): is a mechanism for transmitting IPv6 packets over IPv4 network. The word "automatic" means that once an ISATAP server/router has been set up, only the clients must be configured to connect to it.

NEW QUESTION: 3 What Cloud Deployment model consist of a cloud infrastructure provisioned for exclusive use by a single organization comprising multiple consumers (e.g., business units)? Such deployment model may be owned, managed, and operated by the organization, a third party, or some Combination of them, and it may exist on or off premises. **A.** Public Cloud **B.** Private Cloud **C.** Community Cloud **D.** Hybrid Cloud **Answer: B** Explanation: Explanation/Reference: Explanation: A Private cloud. The cloud infrastructure is provisioned for exclusive use by a single organization comprising multiple consumers (e.g., business units). It may be owned, managed, and operated by the organization, a third party, or some combination of them, and it may exist on or off premises. Other Cloud Deployment Models are: Community cloud. The cloud infrastructure is provisioned for exclusive use by a specific community of consumers from organizations that have shared concerns (e.g., mission, security requirements, policy, and compliance considerations). It may be owned, managed, and operated by one or more of the organizations in the community, a third party, or some

combination of them, and it may exist on or off premises. Public cloud. The cloud infrastructure is provisioned for open use by the general public. It may be owned, managed, and operated by a business, academic, or government organization, or some combination of them. It exists on the premises of the cloud provider. Hybrid cloud. The cloud infrastructure is a composition of two or more distinct cloud infrastructures (private, community, or public) that remain unique entities, but are bound together by standardized or proprietary technology that enables data and application portability (e.g., cloud bursting for load balancing between clouds).References: NIST Special Publication 800-145 The NIST definition of Cloud Computing and also see NIST Special Publication 800-146 The Cloud Computing Synopsis and Recommendations
