NEW QUESTION: 2 DRAG DROP You are developing Azure WebJobs. You need to recommend a WebJob type for each scenario. Which WebJob type should you recommend? To answer, drag the appropriate WebJob types to the correct scenarios. Each WebJob type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Select and Place:
Answer:
Explanation: Explanation/Reference: Explanation: Box 1: Continuous Continuous runs on all instances that the web app runs on. You can optionally restrict the WebJob to a single instance. Box 2: Triggered Triggered runs on a single instance that Azure selects for load balancing. Box 3: Continuous Continuous supports remote debugging. Note: The following table describes the differences between continuous and triggered WebJobs.
