Create a site-level conferencing policy for all users, a site-level conferencing policy for the managers, and a per-user conferencing policy for the executives.** **D. Modify the global conferencing policy. Create a per-user conferencing policy for the managers and a per-user conferencing policy for the executives.** **Answer: D** **Explanation:** Conferencing policies can be configured at the global, site, or per-user scopes

<http://technet.microsoft.com/en-us/library/gg398293.aspx> we dont know the business needs

**NEW QUESTION: 3** Wählen Sie für jede der folgenden Aussagen Ja aus, wenn die Aussage wahr ist. Andernfalls wählen Sie Nein. HINWEIS: Jede richtige Auswahl ist einen Punkt wert. **Answer:** **Explanation:**

**NEW QUESTION: 4** Which kind of scaling is supported by virtual machines in Oracle Cloud Infrastructure Compute service? **A. Only scaling in** **B. Only scaling out** **C. Only scaling up or down** **D. Scaling up or down, and scaling in or out** **Answer: D** **Explanation:** **Explanation** To change the shape of an OCI Instance You can change the shape of a virtual machine (VM) instance without having to rebuild your instances or redeploy your applications. This lets you scale up your Compute resources for increased performance, or scale down to reduce cost. Autoscaling lets you automatically adjust the number of Compute instances in an instance pool based on performance metrics such as CPU utilization. This helps you provide consistent performance for your end users during periods of high demand, and helps you reduce your costs during periods of low demand. As load increases, instances are automatically provisioned: the instance pool scales out. As load decreases, instances are automatically removed: the instance pool scales in.
