Our society needs all kinds of comprehensive talents, the 1Y0-205 study materials can give you what you want, but not just some boring book knowledge, but flexible use of combination with the social practice.

We, as a leading company in this field, have been paying much attention to [1Y0-205](#) high speed and high efficiency, DumpCollection is a good website that provides you with high quality and great value IT certification exam materials.

Sure, we offer the 1Y0-205 free demo questions, you can download and have a try, In the era of rapid development in the IT industry, we have to look at those IT people with new eyes.

NEW QUESTION: 1Your network contains an Active Directory forest. The forest contains the servers in the following table. The dmz.litware.com domain contains mail-enabled user accounts but does not contain any Exchange servers. You plan to replace the existing Exchange servers with new servers that have Exchange Server 2019 installed. You need to extend the schema and prepare the Active Directory domains. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer: Explanation: Explanation

NEW QUESTION: 2A disgruntled employee executes a man-in-the-middle attack on the company network. Layer 2 traffic destined for the gateway is redirected to the employee's computer. This type of attack is an example of: **A.** amplified DNS attack **B.** IP spoofing **C.** evil twin **D.** ARP cache poisoning **Answer: D** Explanation: Explanation/Reference:

https://en.wikipedia.org/wiki/ARP_spoofing

NEW QUESTION: 3In a PfR environment, which two statements best describe the difference between active mode monitoring and fast mode monitoring? (Choose two.) **A.** Fast mode monitoring can measure bursty traffic better than active mode. **B.** Active mode monitoring can monitor and measure actual traffic via NetFlow data collection. **C.** Active mode monitoring uses IP SLA probes for the purpose of obtaining performance characteristics of the current WAN exit link. **D.** Fast mode monitoring uses IP SLA probes via all valid exits continuously to quickly determine an alternate exit link. **Answer: C, D** Explanation: Active Monitoring PfR uses Cisco IOS IP Service Level Agreements (SLAs) to enable active monitoring. IP SLAs support is enabled by default. IP SLAs support allows PfR to be configured to send active probes to target IP addresses to measure the jitter and delay, determining if a prefix is out-of-policy and if the best exit is selected. The border router collects these performance statistics from the active probe and transmits this information to the master controller. Fast Failover Monitoring Fast failover monitoring enables passive and active monitoring and sets the active probes to continuously monitor all the exits (probe-all). Fast failover monitoring can be used with all types of active probes: Internet Control Message Protocol (ICMP) echo, jitter, TCP connection, and UDP echo. Reference:
