NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com.You have a Group Policy object (GPO) named GPO1 that contains several user settings. GPO1 is linked to an organizational unit (OU) named OU1.The help desk reports that GPO1 applies to only some of the users in OU1.You open Group Policy Management as shown in the exhibit. (Click the Exhibit button.)You need to configure GPO1 to apply to all of the users in OU1.What should you do?**A.** Enforce GPO1.**B.** Modify the GPO status of GPO1.**C.** Disable Block Inheritance on OU1.**D.** Modify the Security settings of GPO1.**Answer: D**Explanation:Explanation/Reference: Explanation:Inheritance is blocked, but that would only affect policies applied ABOVE the given OU, not the one applied directly to it (as is the case with GPO1). Also Enforcing a policy is only going to cause it to be applied even when inheritance is blocked (which, as mentioned, does not make a difference on policies which are directly linked to the OU as a child). That means that there must be something in the security settings (such as a Security Group which does not have the "read" or "Apply group policy" permission) preventing ALL of the users in OU1 from having the policy applied. (GPO status is the status of its replication within the forest, so it is not relevant here.)

NEW QUESTION: 2Which of the following best describes the conflict between maximising profit and maximising shareholder wealth?**A.** Profit and shareholder wealth are unrelated.**B.** Profits can be increased from one year to the next without increasing shareholder wealth.**C.** Tax is paid on profit, but not on shareholder wealth.**D.** Managers are generally more interested in maximising shareholder wealth than in maximising profits or sales.**Answer: B**

NEW QUESTION: 3Your network contains multiple wireless access points (WAPs) that use WPA2-Personal authentication.The network contains an enterprise root certification authority (CA).The security administrator at your company plans to implement WPA2-Enterprise authentication on the WAPs.To support the authentication change, you deploy a server that has Network Policy Server (NPS) installed.You need to configure NPS to authenticate the wireless clients.What should you do on the NPS server?**A.** Add RADIUS clients and configure network policies.**B.** Add RADIUS clients and configure connection request policies.**C.** Create a remote RADIUS server group and configure connection request policies.**D.** Create a remote RADIUS server group and install a server certificate.**Answer: A**Explanation: <https://ittrainingday.com/2013/12/25/how-to-configure-a-windows-radius-server-for-802-1x-wireless-or-wired-connections/>
