operating system and boosts 2 modes for practice and you can practice offline at any time.

Today, the prevailing belief is that knowledge is stepping-stone to success, So you will never be disappointed once you choosing our 300-715 latest dumps and you can absolutely get the desirable outcomes.

We are being followed by many companies but never surpassed, As you can see, our 300-715 exam torrent is truly helpful to those who want to get the certificate.

If you use our 300-715 test quiz, we believe you will know fully well that our product is of superior quality, other products can't be compared with it, For each version, there is no limit and access permission if you want to download our 300-715 study materials, and it really saves a lot of time for it is fast and convenient.

NEW QUESTION: 1 Joe notices there are several user accounts on the local network generating spam with embedded malicious code. Which of the following technical control should Joe put in place to BEST reduce these incidents? **A.** Account lockout **B.** Least privilege **C.** Password complexity **D.** Group Based Privileges **Answer: A**

NEW QUESTION: 2 DRAG DROP Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 R2. You plan to install the Active Directory Federation Services server role on Server1 to allow for Workplace Join. You run nslookup enterprise registration and you receive the following results: You need to create a certificate request for Server1 to support the Active Directory Federation Services (AD FS) installation. How should you configure the certificate request? To answer, drag the appropriate names to the correct locations. Each name may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **Answer:** Explanation: Obtain a server SSL certificate from either a public certificate authority (CA) or from your organization's PKI subordinate CA that is trusted by a public certificate authority. The server SSL certificate must have the following certificate attributes to be used with Workplace Join: - Subject Name (CN): adfs1.contoso.com - Subject Alternative Name (DNS): adfs1.contoso.com - Subject Alternative Name (DNS): enterpriseregistration.contoso.com

NEW QUESTION: 3 What type of attack is likely occurring if you see a significant increase in network traffic and users complain that the web server is hung up? **A.** Ping sweep **B.** DoS **C.** MITM **D.** DNS spoofing **Answer: B**

NEW QUESTION: 4 You have a project in Azure DevOps. You have an Azure Resource Group deployment project in Microsoft Visual Studio that is checked in to the Azure DevOps project. You need to create a release pipeline that will deploy resources by using Azure Resource Manager templates. The solution must minimize administrative effort. Which task type should you include in the solution? **A.** Azure Cloud Service Deployment **B.** Azure RM Web App Deployment **C.** Azure PowerShell **D.** Azure App Service Manage **Answer: C** Explanation: There are two different ways to deploy templates to Azure DevOps Services. Both methods provide the same results, so choose the one that best fits your workflow. 1. Add a single step to your build pipeline that runs the PowerShell script that's included in the Azure Resource Group deployment project (Deploy-AzureResourceGroup.ps1). The script copies artifacts and then deploys the template. 2. Add multiple Azure DevOps Services build steps, each one performing a stage task. The first option has the advantage of using the same script used by developers in Visual Studio and providing consistency throughout the lifecycle.
