And more than 8500 candidates join [PAL-I](#) in our website now, Thanks Estruturit for the best dumps.

NEW QUESTION: 1 DRAG DROP You manage a SharePoint environment. You need to block all ports on the SharePoint Servers that are not used for essential communications. To answer, drag the appropriate set of port ranges to the correct service. Each set of ports ranges may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point. Select and Place:

Answer: Explanation:

NEW QUESTION: 2 What is the correct sequence of steps required to create and implement a plug-in? **A.** Write program logic, create Algorithm Type referencing program, create Algorithm referencing Algorithm Type, plug in Algorithm into applicable plug-in point. **B.** Write program logic, create Algorithm Type referencing program, plug in Algorithm Type into applicable plug-in point. **C.** Write program logic, create Algorithm referencing program, plug in Algorithm into applicable plug-in point. **D.** Write program logic directly into plug-in point. **E.** Write program logic, plug in to appropriate plug-in point. **Answer: B**

NEW QUESTION: 3 For single line event sourcetypes. it is most efficient to set SHOULD_linemerge to what value? **A.** False **B.** Newline Character **C.** True **D.** <regex string>

Answer: A

NEW QUESTION: 4 Click the Exhibit button A user complains that they cannot reach a destination host using Telnet. The user expresses concern that the SRX Series device is blocking the connection attempt. You check the security policy log on the SRX device and see the entry shown in the exhibit. Based on the security policy log entry, which three statements describe why the user is unable to use Telnet to reach the destination host? (Choose three.) **A.** Another device between the SRX device and destination host is blocking the request. **B.** A trace options flag is set on the SRX device to drop the telnet traffic. **C.** The destination host does not have a valid route for the user's PC. **D.** The destination host is not listening on the requested service. **E.** No security policy is configured on the SRX device to match the request. **Answer: A, C, D**

Explanation: Based on security policy log entry we can confirm that "allow-telnet" security policy is configured on the SRX device and SRX device does not receive any packet from remote telnet server as the both server-packets(server-bytes) are zero. So the possible options are B, C, D. Reference: <http://www.juniperforum.com/index.php?topic=10131.0>
