NEW QUESTION: 4You need to have an invoice line automatically distributed across multiple cost centers. For example, you want your monthly utility bill allocated across multiple cost centers based on a percentage.Select two methods to achieve this. (Choose two.)**A.** Define a distribution set and assign it manually to the invoice.**B.** Choose the 'All Lines' option from the Allocate menu in the invoice line area.**C.** Configure Subledger Accounting rules to allocate

costs.**D.** Define a distribution set and assign it to the supplier.**Answer: A,C**Explanation:A: Account Rules by Segment Define segment rules to derive a specific segment of the general ledger account. For example, a particular segment like the company segment can be determined from the distribution account. Another segment can be determined with the use of a constant value. Creating the account one segment at a time offers greater flexibility, but also requires more setup.C: You can use a Distribution Set to automatically enter distributions for an invoice when you are not matching it to a purchase order. For example, you can create for an advertising supplier a Distribution Set that allocates advertising expense on an invoice to four advertising departments.
