NEW QUESTION: 1You are designing an Exchange Server 2010 environment. The environment will include three datacenters, located in Seattle, Dallas, and Miami. Each datacenter will have a separate Active Directory Domain Services (AD DS) site. The Seattle and Miami datacenters will each contain two Mailbox servers. The Dallas datacenter will not contain Mailbox servers. All Mailbox servers will be members of a single database availability group (DAG). You need to recommend the minimum file share witness configuration necessary to ensure that if the Seattle datacenter fails, the DAG will continue to function. What should you recommend?
A. Place one file share witness in the Seattle datacenter.
B. Place one file share witness in the Dallas datacenter.
C. No file share witnesses are necessary.
D. Place one file share witness in the Seattle datacenter and one alternate file share witness in the Miami datacenter.
Answer: B

NEW QUESTION: 2When is the intent resolution process triggered?
A. When an explicit intent starts a service.
B. When the system receives an explicit intent to start an activity.
C. When the system receives an implicit intent to start an activity.
D. When the application calls method startActivityIntentResolution.
Answer: C

NEW QUESTION: 3Which of the following statements are true about the DIS in IS-IS? (Multiple Choice)
