**A.** SecurID  
**B.** Check Point Password  
**C.** TACACS  
**D.** OS Password  
**Answer: B**

**NEW QUESTION: 3**SCENARIO  
Please use the following to answer the next question:  
Brady is a computer programmer based in New Zealand who has been running his own business for two years. Brady's business provides a low-cost suite of services to customers throughout the European Economic Area (EEA). The services are targeted towards new and aspiring small business owners. Brady's company, called Brady Box, provides web page design services, a Social Networking Service (SNS) and consulting services that help people manage their own online stores. Unfortunately, Brady has been receiving some complaints. A customer named Anna recently uploaded her plans for a new product onto Brady Box's chat area, which is open to public viewing. Although she realized her mistake two weeks later and removed the document, Anna is holding Brady Box responsible for not noticing the error through regular monitoring of the website. Brady believes he should not be held liable. Another customer, Felipe, was alarmed to discover that his personal information was transferred to a third-party contractor called Hermes Designs and worries that sensitive information regarding his business plans may be misused. Brady does not believe he violated European privacy rules. He provides a privacy notice to all of his customers explicitly stating that personal data may be transferred to specific third parties in fulfillment of a requested service. Felipe says he read the privacy notice but that it was long and complicated. Brady continues to insist that Felipe has no need to be concerned, as he can personally vouch for the integrity of Hermes Designs. In fact, Hermes Designs has taken the initiative to create sample customized banner advertisements for customers like Felipe. Brady is happy to provide a link to the example banner ads, now posted on the Hermes Designs webpage. Hermes Designs plans on following up with direct marketing to these customers. Brady was surprised when another customer, Serge, expressed his dismay that a quotation by him is being used within a graphic collage on Brady Box's home webpage. The quotation is attributed to Serge by first and last name. Brady, however, was not worried about any sort of litigation. He wrote back to Serge to let him know that he found the quotation within Brady Box's Social Networking Service (SNS), as Serge himself had posted the quotation. In his response, Brady did offer to remove the quotation as a courtesy. Despite some customer complaints, Brady's business is flourishing. He even supplements his income through online

behavioral advertising (OBA) via a third-party ad network with whom he has set clearly defined roles. Brady is pleased that, although some customers are not explicitly aware of the OBA, the advertisements contain useful products and services. Under the General Data Protection Regulation (GDPR), what is the most likely reason Serge may have grounds to object to the use of his quotation?**A.** Because of the juxtaposition of the quotation with others' quotations.**B.** Because of the misapplication of the household exception in relation to a social networking service (SNS).**C.** Because of the use of personal data outside of the social networking service (SNS).**D.** Because of the misrepresentation of personal data as an endorsement.**Answer: B**

**NEW QUESTION: 4** Before implementing Fusion Financials, your customer used to manually reconcile their intercompany payables and receivables accounts. What is a more automated approach to do this?**A.** Use Oracle Hyperion Close Manager to automatically reconcile intercompany account balances.**B.** Create a query using Oracle Transactional Business Intelligence (OTBI) that will match the intercompany payables and receivables balances.**C.** Run the BI Publisher reports called Intercompany Transaction Summary and AccountDetails to automatically reconcile intercompany balances.**D.** In Fusion Financials, you must manually reconcile your intercompany account balances.**E.** Run the Intercompany Reconciliation report, which shows pairs of intercompany receivables and payables accounts that are out of balance.**Answer: B**
