NEW QUESTION: 3When using the RegistryLookup Node to submit generic queries to WebSphere Service Registry and Repository, where are the entities returned by the query stored?**A.** In a predefined variable of the Array type.**B.** In one of the output terminal of the RegistryLookup Node.**C.** In a shared variable that makes the data available to subsequent nodes.**D.** In the ServiceRegistry field in the LocalEnvironment.**Answer: D**

NEW QUESTION: 4Penetration tests are sometimes called white hat attacks because in a pen test, the good guys are attempting to break in. What are the different categories of penetration testing? Each correct answer represents a complete solution. Choose all that apply.**A.** Closed-box**B.** Partial-knowledge test**C.** Full-knowledge test**D.** Full-box**E.** Open-box**F.** Zero-knowledge test**Answer: A,B,C,E,F****Explanation:**Explanation/Reference:Explanation: The different categories of penetration testing are as follows: Open-box: In this category of penetration testing, testers have access to internal system code. This mode is basically suited for Unix or Linux. Closed-box: In this category of penetration testing, testers do not have access to closed systems.This method is good for closed systems. Zero-knowledge test: In this category of penetration testing, testers have to acquire information from scratch and they are not supplied with information concerning the IT system. Partial-knowledge test: In this category of penetration testing, testers have knowledge that may be applicable to a specific type of attack and associated vulnerabilities. Full-knowledge test: In this category of penetration testing, testers have massive knowledge concerning the information system to be evaluated. AnswerD is incorrect. There is no such category of penetration testing.
